AMATEUR HOTOGRAPHY.

ddressed "Amateur Pho-," must be in not later than Amateurs are requested prints from their notable s, giving particulars of de-nt, exposure, etc. Their cent, exposure, etc.

Under the heading of "Failures," Lucien P. P. Tull writes the following in the Mail and Express;

Why the photographs made by amateurs are not all good and few are perfeet, may be a profitable question to discuss, and some of the causes pointed

Many failures are the result of choice of subject; it is not suitable, has no increat for anybody; in short, the picture was made simply because the person making it wanted to expose another plate. Hemedy—don't do it. The point of view is responsible for others. Much could be written on this subject, but one will suffice. Suppose one wishes to make a view of a statue in a park. Ninety persons in a hundred rush out in the blazing zun, facus their camera, and, without a thought except to see that the status comes within the field of the lens, snap the shutter and go their way. The other ten walk around it, and examine it from different points of view, getting some dark foliage or building as a background, and looking for the best effect of light focus carefully, decide what length of exposure to give, and having exposed their plates, close their shutters and depart. Don't hesitate to move your camera, even if you are all ready to expose, if on moving a few feet in one direction or another—and a few feet will sometimes make a great difference in the view—you see the effect is better than from where you were standing.

Failures in exposure are among the most common. The different subjects require such different treatment that one should accustom himself to estimating the time to expose from the appearance of the image as shown on the ground glass. In this way, and by keeping a record of every exposure made, one will soon become expert and make very few mistakes.

Don't make snap-shot exposures on dull days,' and shadowy subjects, and expect the best results. It generally means another failure. Developing is another cause. Don't be afraid to leave the negative in the developer until it has acquired density. If you take it out too soon, you will find the plate may have all the detalls visible, but will be so thin that it is impossible to obtain a good print from it. If you had left it in the developer another five minutes, it would have made a fine negative, and you would have had one less fallure.

Over-developting, too, is sometimes a cause. It generally occurs with a plate of medium speed, an

resulting in actean to a developing, fog may be caused by want of cleanlibeas; a little hypo on the hands, or a
frop in the developing dish will cause
fog as surely as exposure to light.
Then, too much alkali in the developer
will cause a decided trace of fog.

DRYING NEGATIVES.

DRYING NEGATIVES.

By taking one-half ounce of formaline to one quart of pure water, mixing same in a bottle, then placing your negative to be dried in this solution, about five minutes after this operation you may hold your negative to any stove or place where heat arises that will evaporate the wet part of the gelathe. Keep in the heat until negative is dry. The same solution may used an indefinite number of times.

Formsiline can be obtained from any drug store at a cost of about fifteen

cents per ounce.

The above formula may be of some service to you when you are in a great hurry to get a print from a negative.

A GOOD DEVELOPER.

A GOOD DEWELOPER,
Solution No. 1-Water, 10 ounces,
metol, 75 grains; hydrogulnone, 59
grains; sulphite of soda, 1½ ounces; Solution No. 2-Water, 10 ounces; carbenate of soda, 12-3 ounces; bromide of
potassium, 8 grains.
For use take one part of No. 1, one
part of No. 2 and one part of water.
Start the plate with No. 1, in order to
follow development and to rectify any
mistakes in exposure. Do not add solution No. 2 and at once, but begin with a
small quantity.

Posted rates \$4 \$21/04 \$3 and \$4 \$51/04 \$6. Silver certificates 5614@57%c. Bar silver

rates 34 52224 so and 84 52724 co. Siver cortilicates 5614-65724 c. Bar silver 56% c. Mexican dollars 46c.

Sugar was the only one of the leading stocks of the list to show any aggressive strength to-day, and after rising at one time atmost two points it was overcome by the general heaviness in the rest of the market and closed with only a small fractional net gain. It was a professional traders market throughout and the industrial stocks which had been tecent favorites with the buil clique showed the effect of realizing to-day. All of the local traction stocks were heavy, but the selling was not coupled with any news and the declines were wholly technical. In Manhattan the fall reached two points and in Metropolitan street railway more than that. Brooklyn Transit advanced a fraction, but fell again over a point. Consolidated Gas is 33 points lower than last night. Tobacco was notably active all day and rose quite strongly on an irresponsible published report that the quarterly dividend on the common stock had been advanced again to 3 per cent. Disappointed holders sold mon stock had been advanced again to a 3 per cent. Disappointed holders sold the stock down two points, when it became known that the rate was retained at 2 per cent. New Jersey Central and the coalers generally did not escape the weakness of the other specialties that show sharp losses. An indication of the narrowness of the market was the fact that until near the close there was not a single sale of such usually active stocks as Missouri Pacific and Chesapeake & Ohio. Burlington showed a degree of firmness in the railway list on buying invited by yesterday's decline. The Buffulo, Rochester & Pittsburgh stocks were both conspicuous for strength, the common advancing two points and the preferred four points. Fractional net declines were, however, the rule in the railway list. To-day's clearing house statement showed the sub-treasury a debter again to the extent of \$1,150,852, a reflection of the additional redemptions of Pacific bonds. Still the money market declined to yield its firm tone in any marked degree, and it was only in exceptional cases that bears were below 2½ per cent and in some cases 4 per cent was paid. Demand sterling also hardened a shade to-day. Reports from other domestic centres show that their bank reserves are at present unusually high, but exchanges continue to run against New York. It was reported to-day, however, that Philadelphia and Boston had repaid large loans as the result of the high rates here. The large balances at the clearing house show that there is quife an extensive shifting of loans still in progress. Prices of Americans declined in London and selling here for London account was quite a factor in the decline. non stock had been advanced again to per cent. Disappointed holders sold

London account was quite a factor in the decline.

Activity in the bond market was confined to the middle and high grade issues, the speculative issues being stagnant, prices generally advanced. Total sales \$1.750,000.

United States old 4's coupon and the new 4's reg, were ½ per cent lower bid, the new 4's coupon ½ per cent lower and the 5's ¼ per cent lower.

The total sales of stocks to-day were. 219,100 chares. the decline.

219,100 charcs. The Evening Post's London financial

cablegram says:
Apart from the settlement, there was fittle business in the stock markets here to-day, except in Kaffirs, which are moving upward. Americans were occasionally lower in orde, but very steady

Breadstaffs and Provisions.

CHICAGO—Wheat to-day was apparently held up for a time by a buying flurry in oats. In the last half hour the leading brokers of the buil clique in wheat started to self some May and the crowd emulated and in the end surpassed their efforts in that direction. December wheat was left at a decline of Mac and May 45c. Corn declined \$4c. Oats in the end were left at practically yesterday's closing prices. Provisions ruled strong after a weak opening and made substantial gains in prices.

Wheat was a shade easier at the opening because of a decline of \$4d at Liverpool. There was nothing else of a bearish character in the news, the traders had before them at the opening.

searish character in the news, the tra-ders had before them at the opening, and the market in consequence ruled firm during the forencon within narrow fractions of the starting prices. The opening in May was from 94c to 94%c compared with yesterday's close of 94%c. The spell weakness around the opening soon carried the price down to 93%c, when the strength which developed in oats affected wheat and the market recovered in a short time to 94%c94%c and kept close to these fractions all day. The trading was exceedingly narrow. Traders who favored the bear side had learned a lesson from the buzz-saw tendencies developed gesterday and kept away and in the absence of any important buying demand the market was almost stagmant at times.

mand the market was almost stagnant at times.

Chicaso receipts were much smaller than estimated the day before; the number of cars received by rail were 185, and out of that eighty-seven were contract. The total addition for the day to contract stocks in reguiar elevators was estimated at 185,000 bushels. Minneapolis and Duluch reported 441 cars, against 472 the corresponding day of the previous and 227 a year ago. The Atlantic port clearances of wheat and flour were equal to 543,000 bushels. This helped sustain prices. The estimates of the Argentine exportable surplus circulated yesterday, making it 56,000,000 bushels, was less generally accepted to-day. All the other estimates from reliable and usually well informed sources make Argentina export capacity for the next twelve months someed sources make Argentinas export capacity for the next twive months somewhere between 25,000,000 bushels. The market bear to tweaken in the afternoon when closing cables indicating rather easy foreign markets were received. The bearishness that started continued to increase as the session neared its end and whereas no one dared touch it in the forenoon, the whole crowd got after it when they saw it was on the run. Allen & Grier, for the bull clique, put a big line on the market and from 30% to which price May had dropped meanwhile, that option dropped like a shot to 25%, every-body taking a kick at it. Then it rebounded and just at the close it sold at 2% c, a decline of 1½ c. Little was done in December, but it also was heavy. Armour & Company were reported to be sellers of it through brokers. It opened at 29c and declined to 26½ c, closed at that, as compared with 19½ c yesterday. Corn was inclined to be weak. There was a good-sized scalping trade with prices easy early on liquidation, with steadiness later with oats, then weak finally with wheat, considerable profit taking and liquidation accelerating the downward movement. The close was easy at close to bottom figures. May ranged from 30½ to 25% 29%; c, and closed at 29%; c.

Market for oats were again prominent to-day. Profit staking and liquidation pone and was the strongest of all the grains. Opening steady, prices suffered a slight decline through liquidation by longs. Good busing by commission houses, short scalpers and the trade in general soon caused an advance which carried the price to 24%; and the grains of the products strong. A little weakness developed at the sate and vance which carried the price to 24%; beavy buyers were again prominent to-day. Profit staking and the trade in general soon caused an advance which carried the price to 24%; beavy buyers were again prominent to-day. Profit staking and the trade in general soon caused an advance which carried the price to 24%; beavy buyers with a good many orders from 21½ for the products and mai pacity for the next twelve months somewhere between 25,000,000 bushels and 29,000,000 bushels. The market began to
